# KCNH1 antibody

Catalog No: #39061

Package Size: #39061-1 50ul #39061-2 100ul

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

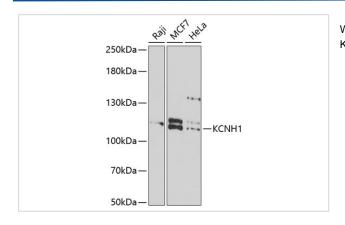

## Description

| Purification Antibodies were purified by affinity purification using immunogen.  Applications WB  Species Reactivity Human,Mouse,Rat  Specificity The antibody detects endogenous level of total KCNH1 protein.  Immunogen Type Recombinant Protein  Immunogen Description Recombinant protein of human KCNH1.  Target Name KCNH1  Other Names EAG; EAG1; h-eag; Kv10.1;   | Product Name          | KCNH1 antibody   |

| Concentration 1.0mg/ml   | SDS-PAGE MW           | 111kd  |
|  | Concentration         | 1.0mg/ml   |
| Formulation Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02%   | Formulation           | Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% |
| sodium azide and 50% glycerol.   |                       | sodium azide and 50% glycerol.   |
| Storage Store at -20°C   | Storage               | Store at -20°C   |

## **Application Details**

Western blotting: 1:500 - 1:2000

#### **Images**

Western blot analysis of extracts of various cell lines, using KCNH1 antibody at 1:1000 dilution.

#### Background

Voltage-gated potassium (Kv) channels represent the most complex class of voltage-gated ion channels from both functional and structural standpoints. Their diverse functions include regulating neurotransmitter release, heart rate, insulin secretion, neuronal excitability, epithelial electrolyte

transport, smooth muscle contraction, and cell volume. This gene encodes a member of the potassium channel, voltage-gated, subfamily H. This member is a pore-forming (alpha) subunit of a voltage-gated non-inactivating delayed rectifier potassium channel. It is activated at the onset of myoblast differentiation. The gene is highly expressed in brain and in myoblasts. Overexpression of the gene may confer a growth advantage to cancer cells and favor tumor cell proliferation. Alternative splicing of this gene results in two transcript variants encoding distinct isoforms.

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
