MDM2(phospho-Ser166) Antibody

Catalog No: #11550

Package Size: #11550-1 50ul #11550-2 100ul

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

| Product Name | MDM2(phospho-Ser166) Antibody |
|-----------------------|--|
| Host Species | Rabbit |
| Clonality | Polyclonal |
| Purification | Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates. |
| | Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phospho |
| | specific antibodies were removed by chromatogramphy using non-phosphopeptide. |
| Applications | WB IHC IF |
| Species Reactivity | Hu |
| Specificity | The antibody detects endogenous level of MDM2 only when phosphorylated at serine 166. |
| Immunogen Type | Peptide-KLH |
| Immunogen Description | Peptide sequence around phosphorylation site of Serine 166 (A-I-S(p)-E-T) derived from Human MDM2. |
| Target Name | MDM2 |
| Modification | Phospho |
| Other Names | HDMX, hdm2 |
| Accession No. | Swiss-Prot: Q00987NCBI Protein: NP_002383.2 |
| Concentration | 1.0mg/ml |
| Formulation | Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% |
| | sodium azide and 50% glycerol. |
| Storage | Store at -20°C for long term preservation (recommended). Store at 4°C for short term use. |

Application Details

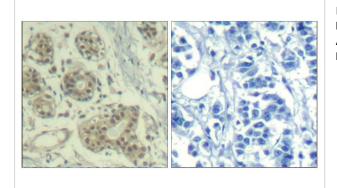

Predicted MW: 90kd

Western blotting: 1:500~1:1000
Immunohistochemistry: 1:50~1:100
Immunofluorescence: 1:100~1:200

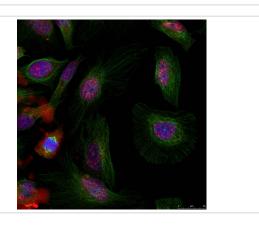

Images

Western blot analysis of extracts from 293 cells untreated or treated with Hydroxyurea using MDM2(phospho-Ser166) Antibody #11550.

Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using MDM2(Phospho-Ser166) Antibody #11550(left) or the same antibody preincubated with blocking peptide(right).

Immunofluorescence staining of methanol-fixed Hela cells using MDM2(phospho-Ser166) Antibody #11550.

Background

This gene is a target gene of the transcription factor tumor protein p53. The encoded protein is a nuclear phosphoprotein that binds and inhibits transactivation by tumor protein p53, as part of an autoregulatory negative feedback loop. Overexpression of this gene can result in excessive inactivation of tumor protein p53, diminishing its tumor suppressor function. This protein has E3 ubiquitin ligase activity, which targets tumor protein p53 for proteasomal degradation. This protein also affects the cell cycle, apoptosis, and tumorigenesis through interactions with other proteins, including retinoblastoma 1 and ribosomal protein L5. More than 40 different alternatively spliced transcript variants have been isolated from both tumor and normal tissues
