

GLTPD2 Antibody Biotin Conjugated

Catalog No: #C08051B

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	GLTPD2 Antibody Biotin Conjugated
Host Species	Rabbit
Clonality	Polyclonal
Isotype	IgG
Purification	Purified by Protein A.
Applications	WB IHC-P
Species Reactivity	Hu Ms Rt
Immunogen Description	KLH conjugated synthetic peptide derived from human GLTPD2
Conjugates	Biotin
Target Name	GLTPD2
Other Names	glycolipid transfer protein domain-containing protein 2; Glycolipid transfer protein domain containing 2; GLTD2_HUMAN.
Concentration	1mg ml
Formulation	10mM Tris Buffered Saline containing 1% BSA, 50% glycerol and 0.09% sodium azide.
Storage	Store at 4C for 12 months.

Application Details

Western blotting: 1:100-1000Immunohistochemistry1:100-500

Background

The GLTP (glycolipid transfer protein) superfamily is defined by a unique lipid transfer binding fold (GLTP fold) that accelerate glycolipid intermembrane transfer. GLTPD2 is a 291 amino acid protein that belongs to the GLTP family. The gene encoding GLTPD2 maps to human chromosome 17, which comprises over 2.5% of the human genome and encodes over 1,200 genes. Two key tumor suppressor genes are associated with chromosome 17, p53 and BRCA1. Malfunction or loss of p53 expression is associated with malignant cell growth and Li-Fraumeni syndrome. Neurofibromatosis, a condition characterized by neural and epidermal lesions, and dysregulated Schwann cell growth are both linked to mutations on chromosome 17. Alexander disease, Birt-Hogg-Dube syndrome and Canavan disease are also associated with chromosome 17.

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
