Product Name	Tau(Phospho-Thr212) Antibody	
Host Species	Rabbit	
Clonality	Polyclonal	
Isotype	IgG	
Purification	Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates.	
	Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phospho	
	specific antibodies were removed by chromatogramphy using non-phosphopeptide.	
Applications	WB	
Species Reactivity	Human;Mouse;Rat	
Specificity	The antibody detects endogenous level of Tau only when phosphorylated at threonine 212.	
Immunogen Type	Peptide-KLH	
Immunogen Description	Peptide sequence around phosphorylation site of threonine 212 (S-R-T(p)-P-S) derived from Human Tau.	
Conjugates	Unconjugated	
Target Name	Tau	
Modification	Phospho	
Other Names	MAPT; MTAPT; MTBT1; Neurofibrillary tangle protein; PHF-tau	
Accession No.	Swiss-Prot: P10636NCBI Protein: NP _001116538.1	
Concentration	1.0mg/ml	
Formulation	Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02%	
	sodium azide and 50% glycerol.	
Storage	Store at -20°C for long term preservation (recommended). Store at 4°C for short term use.	

### **Application Details**

Predicted MW: 48 62 78 kd

Western blotting: 1:500~1:1000

## **Images**

Western blot analysis of extracts from mouse brain tissue using Tau(Phospho-Thr212) Antibody #11257(Lane 2) and the same antibody preincubated with blocking peptide(Lane1).

### Background

Promotes microtubule assembly and stability, and might be involved in the establishment and maintenance of neuronal polarity. The C-terminus binds axonal microtubules while the N-terminus binds neural plasma membrane components, suggesting that tau functions as a linker protein between both. Axonal polarity is predetermined by tau localization (in the neuronal cell) in the domain of the cell body defined by the centrosome. The short isoforms allow plasticity of the cytoskeleton whereas the longer isoforms may preferentially play a role in its stabilization.
