

# PUMA Monoclonal Antibody

Catalog No: #26010

Package Size: #26010 100ul

Orders: [order@signalwayantibody.com](mailto:order@signalwayantibody.com)Support: [tech@signalwayantibody.com](mailto:tech@signalwayantibody.com)

## Description

Product Name	PUMA Monoclonal Antibody
Host Species	Mouse
Clonality	Monoclonal
Clone No.	mAb (Clone 2A8F6)
Purification	Immunoaffinity chromatography purified IgG
Applications	ELISA WB
Species Reactivity	Human;Rat
Immunogen Type	Recombinant protein
Immunogen Description	Recombinant protein corresponding to amino acids 76 - 170 of human PUMA-alpha.
Conjugates	Unconjugated
Target Name	PUMA
Other Names	PUMA (2A8F6), p53 upregulated modulator of apoptosis, bbc3, Bcl-2 binding component 3
Accession No.	Q9BXH1
Concentration	1mg/ml
Formulation	Supplied in PBS containing 0.02% sodium azide.
Storage	Can be stored at -20°C, stable for one year.

## Images

Western blot analysis of PUMA expression in K562 cell lysate with PUMA antibody at (A) 2.5 and (B) 5 ug/mL.

## Background

Apoptosis is related to many diseases and development. The p53 tumor-suppressor protein induces apoptosis through transcriptional activation of several genes. A novel p53 inducible pro-apoptotic gene was identified recently and designated PUMA (for p53 upregulated modulator of apoptosis) and bbc3 (for Bcl-2 binding component 3) in human and mouse. PUMA/bbc3 is one of the pro-apoptotic Bcl-2 family members including Bax and Noxa, which are also transcriptional targets of p53. The PUMA gene encodes two BH3 domain-containing proteins termed PUMA $\alpha$  and PUMA $\beta$ . PUMA proteins bind Bcl-2, localize to the mitochondria, and induce cytochrome c release and apoptosis in response to p53. PUMA may be a direct mediator of p53-induced apoptosis.
