mCherry -Tag Rabbit Polyclonal Antibody

Catalog No: #T521

Package Size: #T521-1 50ul #T521-2 100ul

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

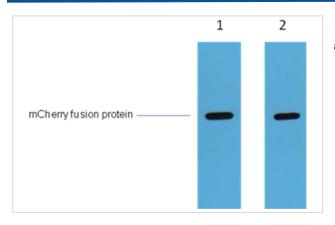

Description

| · · · · · · · · · · · · · · · · · · · | |
|---------------------------------------|---|
| Product Name | mCherry -Tag Rabbit Polyclonal Antibody |
| Host Species | Rabbit |
| Clonality | Polyclonal |
| Purification | Affinity purification using immunogen. |
| Applications | WB |
| Species Reactivity | Human;Mouse;Rat |
| Specificity | The mCherry tag antibody can recognize mCherry tag fusion proteins. |
| Conjugates | Unconjugated |
| Target Name | mCherry-Tag |
| Concentration | 1.0mg/ml |
| Formulation | Rabbit IgG in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% sodium azide |
| | and 50% glycerol. |
| Storage | Store at -20°C |
| | |

Application Details

Western blotting: 1:5000~1:10000

Images

1ug mCherry fusion protein+ Primary antibody #T521 dilution at 1:5,000 (lane 1) and 1:10,000 (lane 2).

Background

mCherry is a fluorophore (a fluorescent molecule) used in biotechnology as a tracer to follow the flow of fluids, as a marker when tagged to molecules and cells components. mCherry is a monomeric fluorescent construct with peak absorption/emission at 587nm and 610nm, respectively. It is resistant to photobleaching and is stable. mCherry is sometimes preferred to other fluorophores due to its colour, as well as its photostability compared to other monomeric fluorophores.

| Note: This product is for in vitro research use only and is not intended for use in humans or animals. | | |
